P190316F	Waters Edge, Sharman Pitch, Howle	Erection of 8 Dwellings and associated works	Planning permission	The Council wish to make the following requests and comments ● The Council assume that the planning authorities are qualified to deal with matters arising from the proximity of the development to AONB and the core strategy implications. ● The Council are not convinced that the traffic statement correctly reflects the actual usage of the roads and asks that there be a re-analysis of the traffic flows. ● The area has suffered from severe problems with overflow parking on the roads. The Council don't think that the provision of garages will accommodate modern cars and that 2 parking spaces would not be sufficient especially for the larger houses. The Council would like the parking provision to be reviewed. ● Greater consideration should be made of the appearance of the development in the context of the existing dwellings in the area. ● Although there was an outline description of sustainability of drainage in the development, there is no reference to sustainable energy plans	06/05/2019
