

Managing Flood Risk with Nature

Join us for a day of free training
2nd December 2024, Lydart nr Monmouth

An event for farmers, land managers, contractors, & officers

Do you want to:

- Manage water on your land?
- Reduce erosion?
- Slow the loss of valuable soil and nutrients?
- Learn a new skill to make money from installing natural flood management structures on your land and other sites?
- Improve your watercourses for wildlife?

**Scan the QR code for an
introduction to Natural
Flood Management**

This free, one day training will include an introduction to the principles of Natural Flood Management (NFM), with a focus on Leaky Woody Structures (LWS), & provides an opportunity to observe the installation of new LWS and engage in discussion and thinking around placement and construction. Training led by Tom Johnstone, we are Nature Based CIC.
